

Downloading EPUB eBooks to a Nook using Overdrive

The Belvedere-Tiburon Library has started a new collection of nearly 100 downloadable EPUB-format electronic books that are compatible with Mac and PC computers and may be transferred to portable ereaders like the Barnes & Noble Nook. The Amazon Kindle is not supported. To find out if your ereader is supported, visit this web page: <http://www.overdrive.com/resources/drc/>

eBooks are hosted on the Overdrive platform. Follow the steps below to download and transfer a title to a Nook. Note that direct download to a Nook is not possible; you will need to load the title to a laptop or desktop computer and then transfer it to the Nook. If you have any trouble, please call the Reference Desk at 789-2661. This collection is only available to Belvedere and Tiburon residents.

- Using your web browser, go to the Belvedere-Tiburon Library eBook and Audiobook Download page at overdrive.bel-tib-lib.org
- Begin by logging into your account. Click the Login button in the header of the page. Now enter your library card barcode number and PIN and click **GO**. If you don't remember your PIN, please call the library reference desk at 789-2661.
- Now that you are logged in, the next step is to retrieve the list of EPUB books. Note that the collection also contains a collection of MP3 audiobooks.
- To see a list of EPUB titles, click on the "Advanced Search" link below the search box on the left side of the page. Use the pull-down menu next to "Format:" to select "Adobe EPUB". Click the **Search** button to see a list of all EPUB titles. If a title is checked out, you may place a hold on it and you will be notified via email when it is available.
- To see a list of EPUB ebooks that are not checked (and therefore available to read immediately), go to the Advanced Search page by clicking on the link below the search box in the left column. Select Format: Adobe EPUB eBook and click in the check box that says "Only show titles with copies available." Now click the **Search** button at the bottom of the page. You will now see a list of items that are currently available for checkout.
- When you find an available title that you would like to check out, click on the link that says "Add to Cart" below and to the right of the title.
- Now click on the "Proceed to Checkout" below the title in your Cart.
- From the Check Out page, specify the lending period (7 to 21 days) and click the **Confirm check out** button.
- If you have not previously installed the Adobe Digital Editions software, click on the "Click here to download the software needed..." link. Now click the **Get Adobe Digital Editions** button. Follow the prompts to download and install the software to your computer.

- Adobe Digital Editions will launch once it has loaded. Use the set up assistant to enter your Adobe ID if you already have one. If you don't have an Adobe ID, click on the link to "get an Adobe ID online." Your Adobe ID will make it possible to transfer an EPUB book from your computer to your Nook. Adobe Digital Editions also requires a recent version of Adobe Flash (Adobe will let you know if you need an update).
- Once you have downloaded and installed Adobe Digital Editions you may now return to the web browser window showing your title and click the **Download** button. Accept the download and confirm that you want to open the book with Adobe Digital Editions. Your book will open once the download is completed.
- If you haven't already done so, connect your Nook to your computer using the USB cable that came with the device (remove the electrical plug adapter from the end of the power cable to reveal the USB plug).
- Once connected, your Nook should appear in the left column of Adobe Digital Editions when you are in Library view (the book spine icon in the upper left corner). The header of the column is "Bookshelves." It may take a few seconds for your Nook to appear.
- Now place your mouse pointer over the cover image of the title you have just downloaded and click and drag the cover so the pointer is now over the Nook icon in the left column. A green "+" sign should appear. Now drop the cover by unclicking. This will copy the title onto your Nook.
- To find your book on your Nook go to the main menu of the Nook. If you have a Black and White Nook, touch the **my library** button, then the link for "Go to My Documents." The name of your book should appear on the display screen of your Nook. Tap to open the book. If you have a Color Nook, go into your library and touch the icon for **my files**. Now touch the folder for **Digital Editions**. The name of your book should appear on a book-cover icon on the Digital Editions screen.
- Enjoy! Note that the book may no longer be readable on your Nook once the check out period ends.
